RE: Commitment to join the NSF I/UCRC Center for Big Learning (CBL)

Dear Prof. Li,

This letter is to state that <Company Name> has the intention to join the National Science Foundation Industry/University Cooperative Research Center for Big Learning (CBL). Contingent upon the I/UCRC grant awarded by the National Science Foundation (NSF), we commit to support the center via <N, e.g., one, two, or three> membership(s) at the University of Florida at the level of \$50,000 per membership with the intention of remaining a fee-paying member for at least two years per the details as specified in the proposed CBL Center membership agreement and bylaws.

Deep Learning and its large-scale models, big data applications, and intelligent platforms have ushered in tremendous opportunities in industry. The key research thrusts of CBL are well aligned with our strategic plans, (optional: particularly ???).

We understand that this letter will be used to support the I/UCRC grant proposal to the National Science Foundation. We are excited about this promising initiative by a strong team across multiple sites. We look forward to collaborating with Center for Big Learning.

Sincerely yours,

(Signature)
